The following guide walks you through connecting to the eduroam WiFi with macOS.

**Note:** This documentation was created using a MacBook Pro running Mojave software version 10.14.3.

1. To access the *WiFi Settings*, click the **Wi-Fi menu** icon on the *Menu bar* of your device (See Figure 1).
2. Make sure that *Wi-Fi* is turned on; if not, click **Turn Wi-Fi On** (See Figure 1).

![Figure 1 - Turn Wi-Fi on](image1)

3. Click **eduroam**.

![Figure 2 - Click KSU](image2)
4. The KSU WiFi - Login dialog box will open. Enter:
   a. NetID (See Figure 3)
   b. NetID Password (See Figure 3)
5. Click Join (See ).

**Note:** Click the checkbox beside Remember this network to connect automatically in the future.

---

6. The Verify Certificate window will open. Click Continue.

---
7. The *Certificate Trust Settings* dialog box will open. Enter:
   a. **NetID** (See Figure 5)
   b. **NetID Password** (See Figure 5)
8. Click **Update Settings** (See Figure 5).
