

Connecting to KSU WiFi on a Chromebook

The following guide walks you through connecting to the KSU WiFi using a Chromebook.

Note: This guide was written using an Asus C300 Chromebook on Chrome OS version 60.0.3112.112.

1. To access the *WiFi Settings*, click the **status tray**.

Figure 1 - Click Status Tray

2. The *Status Tray* will open. Click the **WiFi icon**.

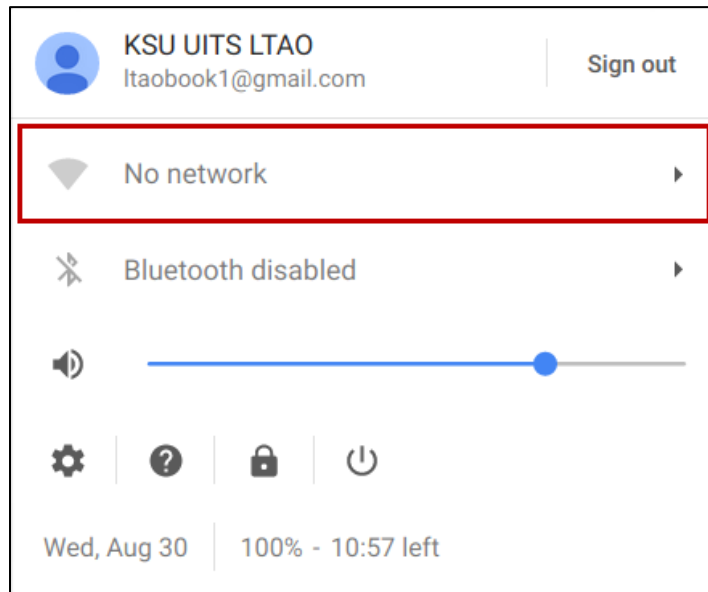

Figure 2 - Click the Wifi Icon

3. A list of access points will display. Click **KSU**.

Figure 3 - Click KSU

4. The *Join WiFi network* window will open. Enter the following settings:
 - a. *EAP method*: Select **PEAP** from the drop-down (See Figure 4).
 - b. *Phase 2 authentication*: Select **MSCHAPv2** from the drop-down (See Figure 4).
 - c. *Server CA certificate*: Select **Do not check** from the drop-down (See Figure 4).
 - d. *Identity*: Enter your **NetID** (See Figure 4).
 - e. *Password*: Enter your **KSU password** (See Figure 4).
 - f. Make sure **Save identity and password** is checked (See Figure 4).
 - g. Click **Connect** (See Figure 4).

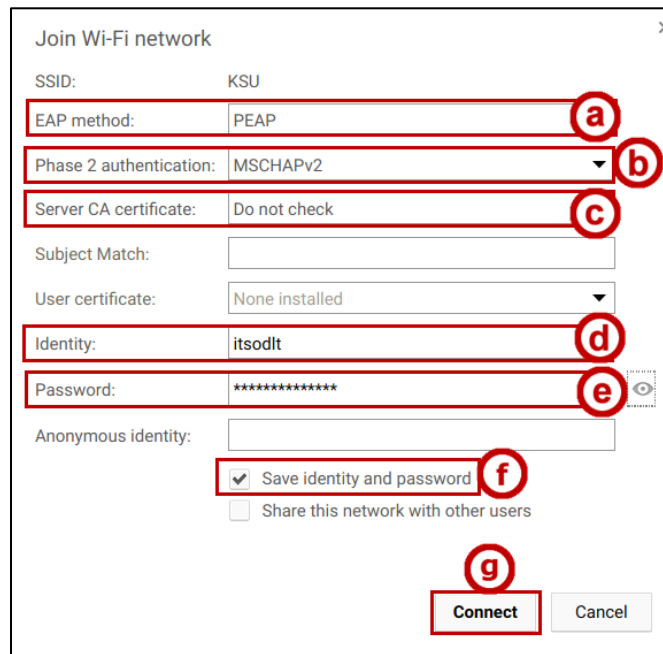

Figure 4 - Enter WiFi Settings

5. You are now signed in to KSU WiFi.
