KSU Campus Network Access in Windows 10

The following describes how to use the GlobalProtect agent to connect remotely to the campus network using a VPN connection. For information on installing the GlobalProtect Agent to utilize a VPN connection, please refer to our VPN Client Installation for Windows 10 documentation at https://uits.kennesaw.edu/cdoc.

**Note:** This guide was written using Google Chrome version 64.0.3497.100.

**Establishing the VPN connection on an Off-Campus PC or Laptop**

1. Access the VPN agent by clicking the **GlobalProtect** icon in the taskbar system tray. (See Figure 1).

   ![Figure 1 - Taskbar System Tray](image)
   
   Figure 1 - Taskbar System Tray

2. The GlobalProtect agent panel will appear. Click **Connect**.

   ![Figure 2 - Click Connect](image)
   
   Figure 2 - Click Connect
3. The *GlobalProtect Sign In* window will appear with the vpn portal address entered during client installation (vpn.kennesaw.edu). Enter your **NetID** and **password** (See Figure 3).

4. Click **Sign In** (See Figure 3).

![Figure 3 - Enter Login Credentials](image)

5. The agent will begin the connection process.

6. When successfully connected, the Status indicator will change to **Connected** and the GlobalProtect icon will change color. You are now connected to the KSU campus network through the GlobalProtect VPN client.

![Figure 5 - Connected](image)
7. The *GlobalProtect Welcome* window appears. Click the **Exit(X)** button to close the window (See Figure 6).

8. If you do not want to see the *Welcome* window in the future, click the **checkbox** in front of *Do not show this page again* (See Figure 6).

**Accessing Campus Services**

Rather than connecting to your office computer, you may wish to use your browser to access commonly used KSU applications and services that can only be accessed while on the KSU network. The KSU VPN serves as an entry point. The following instructions describe how to access the *Campus Intranet* page.

To access the *KSU Campus Intranet* site, use the following steps:

**Note:** The Remote Desktop Connection is not needed to access the campus intranet as long as you are connected to the KSU VPN.

1. After connecting to the KSU VPN, in your preferred browser, navigate to [https://campus.kennesaw.edu/](https://campus.kennesaw.edu/).

2. The *Campus Intranet* website will open. Click on the **link** or **tab** of your choice to access the desired service.

Disconnecting the VPN Connection

1. To disconnect from the network, click the **GlobalProtect icon** in the taskbar system tray.

![Figure 8 - Click the GlobalProtect Icon](image)

2. Click **Disconnect**.

![Figure 9 - Disconnect](image)

3. You will be disconnected from the VPN when the Status indicator changes to **Not Connected** and the GlobalProtect icon changes color.
