KSU Campus Network Access in Windows 10

The following describes how to use the GlobalProtect agent to connect remotely to the campus network using a VPN connection. For information on installing the GlobalProtect Agent to utilize a VPN connection, please refer to our VPN Client Installation for Windows 10 documentation.

Note: This guide was written using Google Chrome version 63.0.3239.132.

Establishing the VPN connection on the Off-Campus PC or Laptop

1. Access the VPN agent by clicking the GlobalProtect icon in the taskbar system tray. (See Figure 1).

   ![Taskbar System Tray](image)
   
   Figure 1 - Taskbar System Tray

2. The GlobalProtect client panel appears. Enter the following:
   a. In the Portal field, enter vpn.kennesaw.edu (See Figure 2).
   b. Click Connect (See Figure 2).

Note: The Status field will indicate Not Connected prior to clicking Connect.
3. The *Portal* field will populate with the VPN address entered previously. Enter your **NetID** and **password** (See Figure 3).

4. Click **Connect** (See Figure 3).

![Figure 3 - Enter Login Credentials](image)

5. When successfully connected, the Status indicator will change to **Connected**. You are now connected to the KSU campus network through the GlobalProtect VPN client.

![Figure 4 - Connected](image)
6. The *GlobalProtect Welcome* window appears. Click the **Exit(X)** button to close the window.

**Note:** If you do not want to see the *Welcome* window in the future, click the **checkbox** in front of *Do not display this page again.*

## Accessing Campus Services

Rather than connecting to your office computer, you may wish to use your browser to access commonly used KSU applications and services that can only be accessed while on the KSU network. The KSU VPN serves as an entry point. The following instructions describe how to access the *Campus Intranet* page.

To access the KSU Campus Intranet site, use the following steps:

**Note:** The Remote Desktop Connection is not needed to access the campus intranet as long as you are connected to the KSU VPN.

1. After connecting to the KSU VPN, open your **preferred browser** (i.e., Mozilla Firefox or Google Chrome).
2. Navigate to [https://campus.kennesaw.edu/](https://campus.kennesaw.edu/).
3. The *Campus Intranet* website will open. Click on the link of your choice to access the desired service.
