

KSU Campus Network Access in Windows 10

The following describes how to use the GlobalProtect app to connect remotely to the campus network using a VPN connection. For information on installing the *GlobalProtect* app to utilize a VPN connection, please refer to our *VPN Client Installation for Windows 10* documentation at <https://uits.kennesaw.edu/cdoc>.

Establishing the VPN connection on an Off-Campus PC or Laptop

1. Access the VPN agent by clicking the **GlobalProtect** icon in the taskbar system tray. (See Figure 1).

Figure 1 - Taskbar System Tray

2. The *GlobalProtect agent panel* will appear. Click **Connect**.

Figure 2 - Click Connect

3. The *Sign In* window will appear. Enter your **KSU Email Address** and **password** (See Figure 3).
4. Click **Sign In** (See Figure 3).

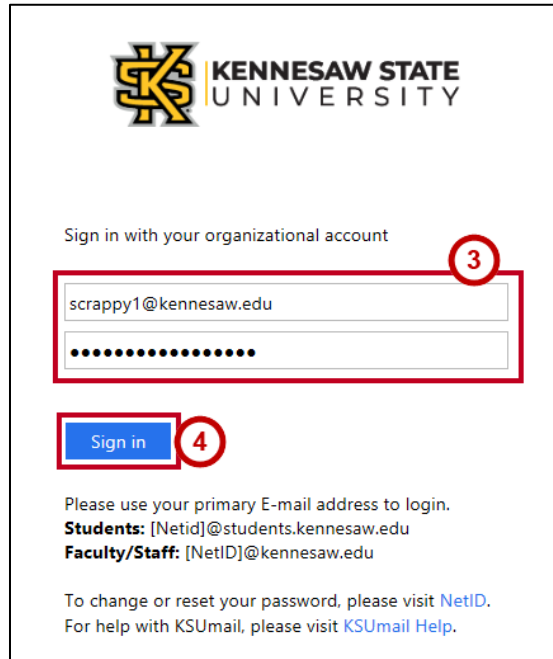

Figure 3 - Sign In

5. You will be directed to the *Duo Authentication* window to verify your identity. Follow the appropriate steps to provide verification.

Note: To access instructions for Duo setup and verification, please visit the [UITS Documentation Center](#).

6. The agent will begin the connection process.

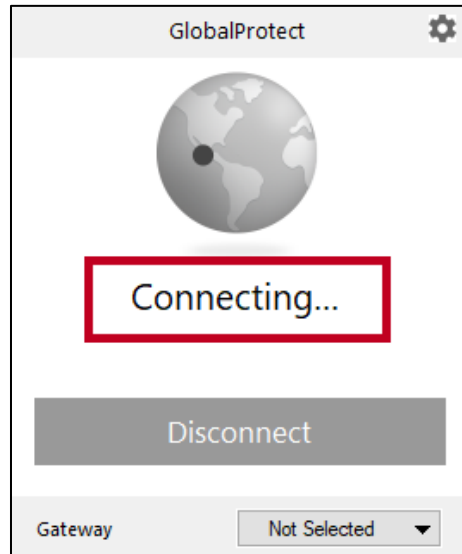

Figure 5 - Connecting to VPN

7. When successfully connected, the status indicator will change to **Connected** and the GlobalProtect icon will change from gray scale to in color. You are now connected to the KSU campus network through the GlobalProtect VPN client.

Accessing Campus Services

Rather than connecting to your office computer, you may wish to use your browser to access commonly used KSU applications and services that can only be accessed while on the KSU network. The KSU VPN serves as an entry point. The following instructions describe how to access the *Campus Intranet* page.

To access the *KSU Campus Intranet* site, use the following steps:

Note: The Remote Desktop Connection is not needed to access the campus intranet as long as you are connected to the KSU VPN.

1. After connecting to the KSU VPN, in your preferred browser, navigate to <https://campus.kennesaw.edu/>.
2. The *Campus Intranet* website will open. Click on the **link** or **tab** of your choice to access the desired service.

Disconnecting the VPN Connection

1. To disconnect from the network, click the **GlobalProtect icon** in the *taskbar* system tray.

Figure 8 - Click the GlobalProtect Icon

2. Click **Disconnect**.

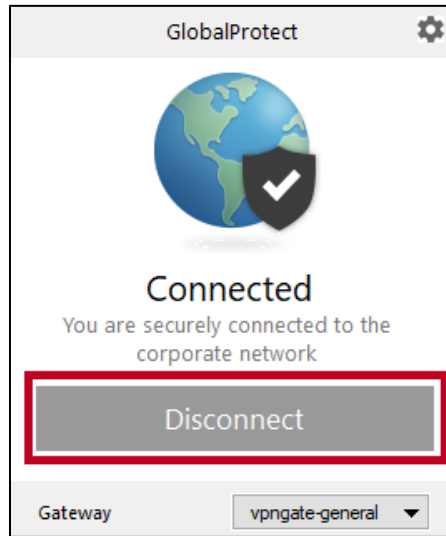

Figure 9 - Disconnect

3. You will be disconnected from the VPN when the status indicator changes to **Not Connected** and the GlobalProtect icon changes color.
