

KSU VPN Client Installation & Campus Network Connection with Android Devices

The following describes how to install and use the GlobalProtect app to connect remotely to the campus network using a VPN connection on an Android device.

Note: This documentation was created using a Samsung Galaxy Tab S (Android version 6.0.1).

Installing the GlobalProtect Agent on Your Android Device

1. Open the Google **Play Store** on your device.

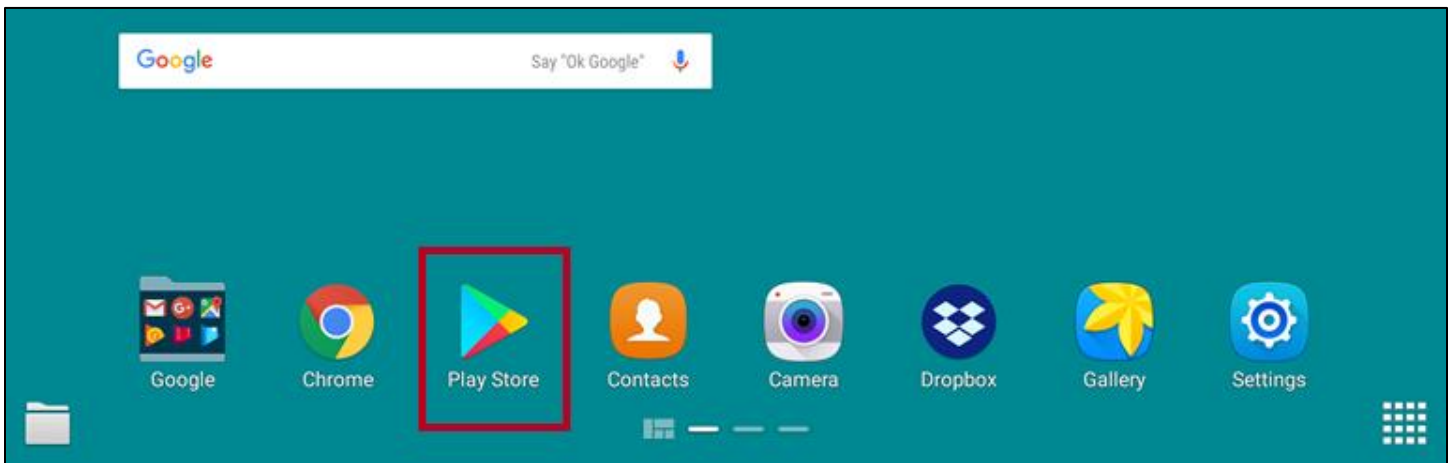

Figure 1 - Open Google Play Store

2. Search for **GlobalProtect**.

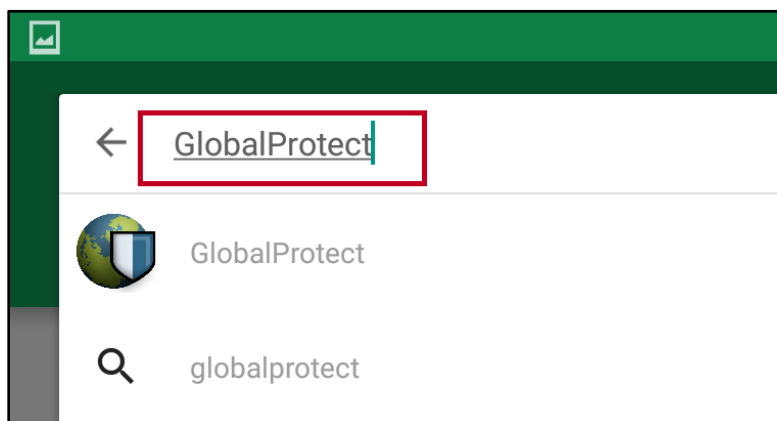

Figure 2 - Search for GlobalProtect

3. Under the application name, tap **Install**.

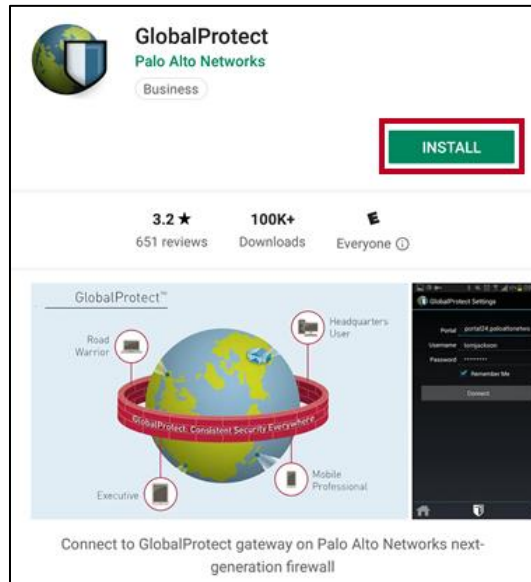

Figure 3 - GlobalProtect App

4. You may receive a GlobalProtect needs access message on your device. Tap **Accept**.

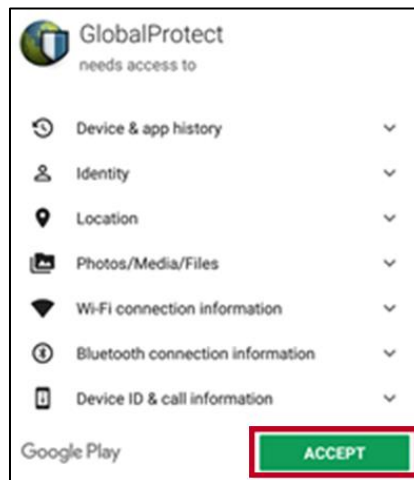

Figure 4 - GlobalProtect Needs Access Message

5. Once installed, tap **Open**.

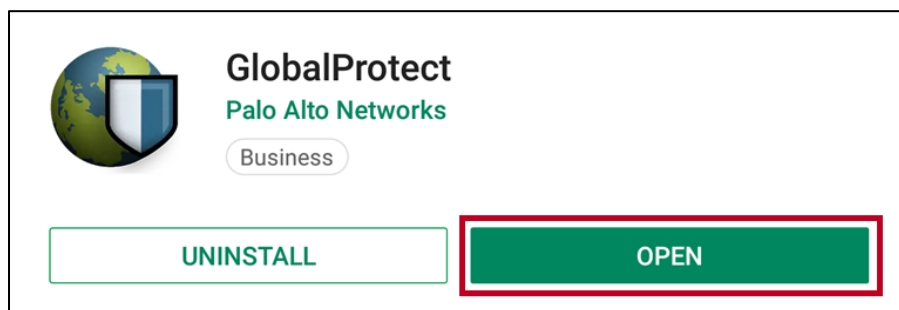

Figure 5 - Open GlobalProtect

6. In the *Portal* field, enter **vpn.kennesaw.edu** (See Figure 6).
7. Tap **Connect** (See Figure 6).

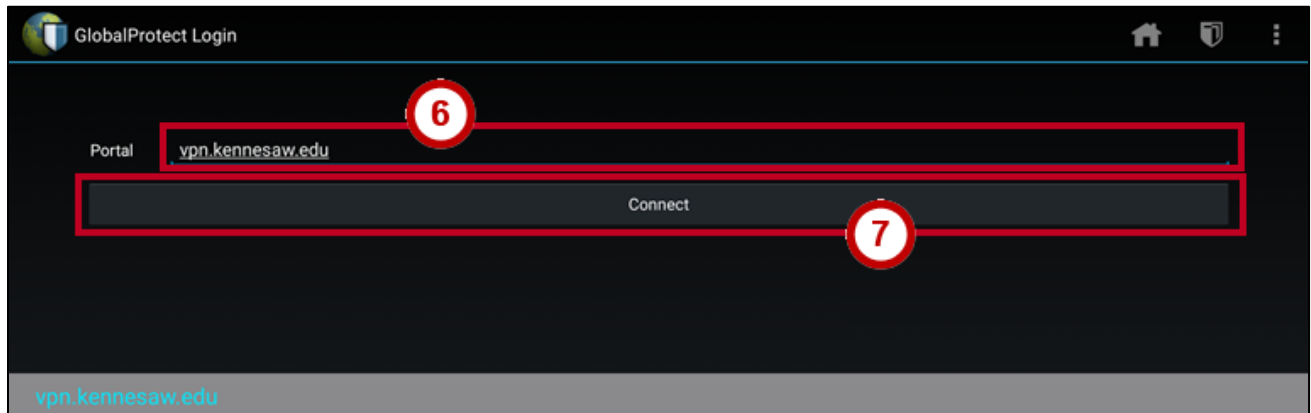

Figure 6 - GlobalProtect Portal

8. The *Sign In* window will appear. Enter your **KSU Email Address** and **password** (See Figure 7).
9. Click **Sign In** (See Figure 7).

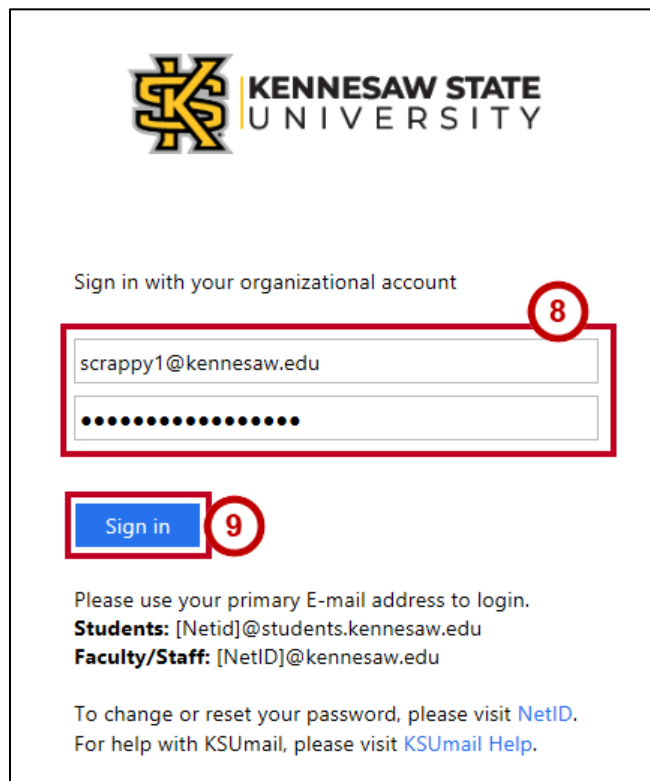

Figure 7 - Sign In

10. You will be directed to the *Duo Authentication* window to verify your identity. Follow the appropriate steps to provide verification.

Note: To access instructions for Duo setup and verification, please visit the [UITS Documentation Center](#).

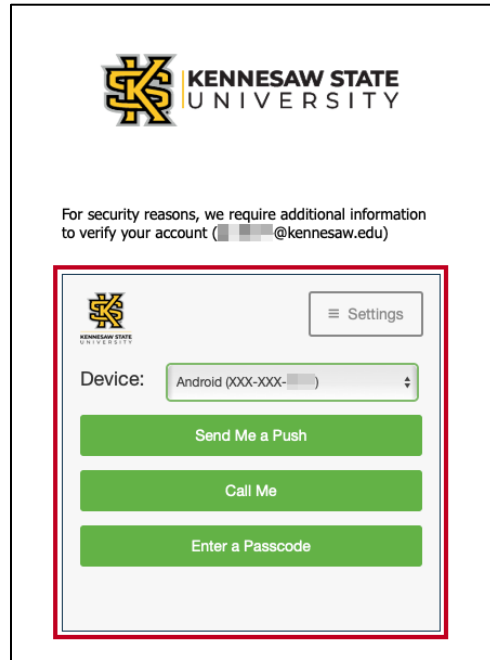

Figure 8 - Duo Verification

11. An *Allow Connection* window will appear. To continue, tap **OK**.

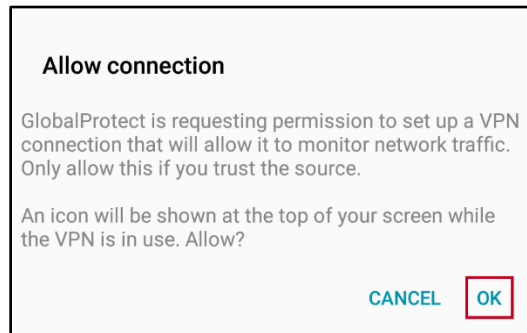

Figure 9 - Allow Connection

12. You have successfully connected to the KSU VPN.

Accessing Campus Services

Rather than connecting to your office computer, you may wish to use your browser to access commonly used KSU applications and services that can only be accessed while on the KSU network. The KSU VPN serves as an entry point. To access the KSU Campus Intranet site, use the following steps:

Note: The Remote Desktop Connection is not needed to access the campus intranet as long as you are connected to the KSU VPN.

1. After connecting to the KSU VPN, open your **preferred browser** (i.e., Mozilla Firefox or Google Chrome).
2. Navigate to <https://campus.kennesaw.edu/>.
3. The *Campus Intranet* website will open. Click on the **link** of your choice to access the desired service.

Disconnecting from the VPN Connection

1. To disconnect from the network, tap the **GlobalProtect** App.

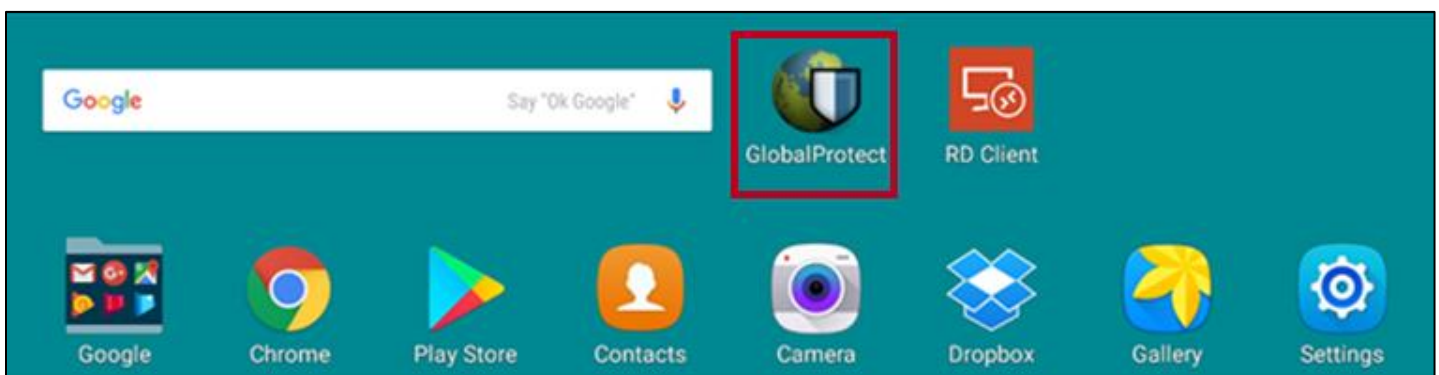

Figure 11 - GlobalProtect App

2. Tap **Disconnect**.
